

Computerized Double - Beam Double - Head Single Needle Quilting Machine (European Imported Sewing Head)

HY-DZ-2L2T

- *It is widely for quilting high-quality mattresses, quilt covers, household, ornaments.
- *Different patterns are available.
- *The structure design of double-beam and double-head can meet the simultaneous quilting of two beds of materials, and the product, on efficiency, space utilization efficiency, and labor utilization efficiency are increased by 100%.
- *Using the original imported industrial sewing machine head from Europe, the maximum processing speed can reach 3000 RPM.
- *Clamping materials, feeding, tensioning, quilting, cross cutting and edge cutting can be realized integration automatically.
- *It has the functions of automatic thread cutting, thread breaking detection, quilting returning. The height of presser foot can be adjusted due to its Unique design, and it is more convenient to operate.
- *Powerful pattern editing and modification functions, support embroidery file format and a variety of quilting file formats.
- *More than 100,000 patterns can be stored.
- *Support all the single needle quilting machines patterns.
- *The use of precision linear guide rail to accurately ensure the relative position of the needle shuttle. High - precision quilting with complex patterns, automatic needle lift, processing simulation, output calculation, and power - off memory during processing, etc.

TECHNICAL SPECIFICATIONS (MM)

Size: (LxWxH)	11500x3800x1650
Quilting Width:	2200
Quilting Thickness:	80
Needle Type:	DP*17 19# / 21# / 22#
Step:	2-8
Needle Speed:	3000 (RPM)
Power:	8.5 KW
Voltage:	3 Phase 380V/50HZ, 3 Phase 220V/50HZ
Weight:	4500 Kg
