

SX-120TA AUTOMATIC DUAL WIRE BONNEL TRANSFER MACHINE

- Steel wire is using the production with wire heating system.
- HMI inserted with intelligent calculation system
- Each string can be with flexible ABC combination springs (three types-different turns, different height, different pitches but final get same pocket height) to get firm and soft in one string.
- There are control systems in each step of production.
- It has an easy-to-use touch screen system indicated by symbols.
- There is fabric correction system
- Error warnings are in English and also other languages are possible upon a requested.
- The materials used are products of internationally known brands. For example; Delta, SMC Pneumatic, Panasonic Sensor, Bauer Sensor)
- One year guarantee for the manufacturing fault
- The machine is CE certified.

TECHNICAL PARAMETERS

Spring Type:	Bonnell
Capacity:	120 springs/min
Max Width:	≤2000 mm
Spring Height:	100-190MM (<100MM, >190MM on request)
Spring End Ring:	∅ 65MM, ∅75MM, ∅80-∅87MM
Spring Steel Wire Gauge	∅ 1.8 - ∅2.4MM
Helical Wire Gauge:	∅ 1.3MM - ∅1.5MM
Convolutions:	4-7
Main Drive Power:	30 KVA
Air Consumption:	10m ³ /h
Weight:	7470 KG
Power Requirement:	380V 3Phase, 50-60Hz (415V - 480V - 220V optional)

- * 110 - 120 springs/min
- * Good for roll packing
- * Helical wire can be clamped
- * Control the direction of each spring; standart one, face to face assembly, one row knots face left, one row knots face right which makes the deviation of diagonal line less than 1 cm, 5 springs knots face left - 5 spring knots face right - DIY
- The factory reserves all rights to change product specifications without any information.
- The machine will be adjusted to a spring size within the range specified in its technical specifications.
- Each additional modification of the actual coil specification may request additional tools.

Face to face

One row knots face left, one row knots face right

分区和硬边框 Zoning and firm edge
